 /numairux

UI/UX designer with a keen eye for detail.

I have 2 years of experience in graphic design, user experience writing, wireframing, and most importantly, UI and Visual design. I would like to work in a positive environment that values my abilities and provides opportunities for advancement.

Throughout, my main goal has been to produce,

- Data-driven user interface designs
- Adaptable design systems for independent and web-based applications
- UI design that is responsive and multi-screen
